

Rex

Made in Finland 

**SPECIALTY GREASE
FOR BICYCLE APPLICATIONS**

ASSEMBLY GREASE

HYDROPHOBIC, ULTRA-LOW FRICTION

UNIQUE INGREDIENTS

**SHARING THE BEST PROPERTIES WITH OUR
HIGHLY ACCLAIMED DOMESTIQUE CHAIN LUBE**

Like the highly acclaimed Rex Domestique Chain Lube, our Assembly Grease also utilizes the same raw materials that we use in our high-fluor ski waxes. This unique approach gives Assembly Grease the same properties our chain lube is known for: Ultra-low friction and good lubricant film creation on metal-to metal surface contacts. The fluorocarbon compounds further enhance the water repellency of the grease. Compared to our chain lube, we turned the product into grease instead of oil. Rex Assembly Grease is made at our factory in Finland, using medical-grade grease and paraffins unlike typical industrial greases.

ANTICORROSIVE

WITH ADDITIONAL PROTECTIVE QUALITIES

In addition to PTFE and fluorocarbon compounds, the grease also contains a special anti-corrosive additive that further enhances protection against rust in headsets and bottom brackets.

FOR ALL BICYCLE APPLICATIONS

Assembly Grease is excellent for headsets and other bearings, bottom brackets, suspension linkages and bushings, axle threads and bolts. Tested year-around in harsh Finnish climate by elite Finnish bikers.

Pakkaus: 50g metallituubi
